

NAME OF THE METHOD	Wraparound system
CHARACTERISTICS According to strengths model	
MAIN GOALS	Social relations Resources Competences Aspirations
REGION OF IMPLEMENTATION <i>Please fill in the geographical area(s) in which the method is used.</i>	
THEORETICAL FRAMEWORK/IDEA/VIEW <i>When a certain view on care or a specific theoretical framework is used, please add it here.</i>	Network based Complex needs
GENERAL DESCRIPTION OF THE METHOD / IMPLEMENTATION <i>Describe the method in general. How is the method implemented?</i>	“a method through which teams come together to create and implement plans to meet needs, achieve outcomes, and improve lives. At the same time, wraparound provides an “on the ground” mechanism for ensuring that core system of care values will guide planning and produce individualized, family-driven and youth-guided support that is community based and culturally competent” Bruns, 2008
STEPS OR PHASES <i>Does the method have a stepwise process? Which are the steps?</i>	Very detailed phases by Walker and Bruns, see ‘more information’.
MATERIAL <i>Which material is needed?</i>	
COST OF THE METHOD (EXCL. PERSONEL) <i>Is the method freely available or not?</i>	
COMPETENCES OF THE AFTER CARE WORKER(S)	
IN WHICH WAY IS THE METHOD SUCCESSFUL? <i>Explain why the method works or seems to work, under which conditions. If research has been done on the method, please also add the information (link, publication, ...).</i>	Showing evidence is not easy, according to Bruns, since there is no clear one-way of working in wraparound. Lots of publications actually phrase a concern on the effectiveness and the fact that there is little evidence on this.
