Project Development Workshop

Youth Care Platform & ENSA Working Groups Youth, Child & Family

Collaboration of:

The European networks [ENSA](#) and [Youth Care Platform](#) are aiming to increase innovation, cooperation and networking amongst their members and European funded projects can contribute to reach these goals. Recipes for social innovation and open, tolerant and inclusive societies are not easy to develop. Mutual learning, experimenting and evaluating the lessons learned via European cooperation is the way forwards. Only... what programs are available (and accessible), how to bring forward your project, where do you find partners?

Therefore the ENSA working groups Youth, Child & Family and the Youth Care Platform are organizing a *project development workshop*. This workshop aims to gather possible project partners around innovative project ideas for vulnerable children, youngsters and their families and networks. We will start with information on funding programs and open calls and then work in small project groups on concrete proposals. The topics will address social inclusion and participation in society, independence and quality of life, integration of services, prevention of addiction, inclusion through sports, social rights, homelessness and housing.

Here enclosed a project template for your ideas on potential projects to use these as base for the workshop. The general European strategies being the European Pillar of Social Rights and the Sustainable Development Goals (SDGs).

We invite you to add this event to your agenda already. Looking forward to seeing you.

Practical information
